

CEO *Insights* TOP 10 CONSTRUCTION & INFRASTRUCTURE COMPANIES - 2020

The standard of a country's development is portrayed by its infrastructure; but in a country like India with a bigger economy rate, the distraught need for infrastructure development has increased the demand of the construction industry too. With government's increased focus on programs like smart city mission, Pradhan Mantri Awas Yojana, industrial corridors, the growth of construction market in India is expected to elevate by 2025, prompting India to be the third largest globally.

New technological equipment and innovative methods, highly contributing in encountering the challenges faced by

the industry in the past times, have also triggered its growth. These additional factors have of course helped minimize the cost of the developmental projects; however, a deep contemplation is still required for the speedy accomplishment of these projects. Albeit, government is paying keen attention to mitigate the gap, but it can never happen with the holistic contribution of the industry leaders, who with their years of extensive industry experience, serve as a major helping hand in times of development and crisis appeasers.

Acknowledging the captains of the construction industry's venomous arena, CEO Insights brings to you 'Top

10 Construction & Infrastructure Companies - 2020', hailing the spirit of these business leaders who, through their ventures, are not only propelling the society towards a progressive growth but are also acting as the aggregators of the smart world, taking the consecutive steps towards a mighty economy. An expert panel of CEOs and industrialists, along with CEO Insight Editorial Board has performed a diligent evaluation of the industry before listing the front-runners. These inspiring companies listed here have distinguished themselves through their uncompromising project delivery. Read to know more about their excellence.

L&W CONSTRUCTION

LEADING THE CHARGE WITH
MODERN & SUSTAINABLE
PROJECTS

As the Indian construction industry is estimated to grow at a rate of 6.4 percent a year between 2018 and 2023, the construction projects in the country are also witnessing an evolution in terms of technological integration, improved construction techniques, latest safety equipment and efficient use of resources. Leading the charge in this revolution is L&W Construction, a 100 percent subsidiary of Lee Kim Tah – Woh Hup Pvt. Ltd., which are two of Singapore's oldest construction companies that have successfully completed landmark projects in many countries over the past nine decades. Through its global quality standards & work methods, L&W Construction has been consistently delivering high quality & reliability in its construction.

Spearheading the organization today, Asaithambi Manickam (Managing Director) has raised in his career to leadership role in global construction industry from the grassroot levels. This paved a strong foundation and provided an exposure to various leadership & operational challenges, best practices, innovative methods and technologies to deliver the best to customers. Also, this has been Asaithambi's forte to identify the root causes and make swift decisions that hugely impact project schedule & cost. Asaithambi, in an exclusive conversation with CEO Insights, delineates the unique aspects that set L & W Construction apart from the herd.

Kindly brief us about L&W Construction and give us some insight on the way you run the company.

We are one of the leading construction companies known for safety, quality integrity, teamwork, innovation and growth. In the commercial projects vertical, we have delivered over 36 million sq. ft. and are

currently involved in over 26 million sq. ft. for marquee clients. Innovative technologies, Sustainability & Value for money being the key focus in our construction projects, we deliver compelling value to commercial, industrial and residential customers by leveraging our rich experience in construction. We have over 150 acres under property development.

Keen on providing complete solutions as one-stop-shop for our customers, we leverage modern work methods, latest equipment, and follow global safety & quality standards in our construction processes. We are immensely deploying Digital technologies (Engineering & Construction 4.0) to improve our operations, internal collaboration and for providing key insights instantly for better governance of our projects. We are diversifying our services to cover multiple areas such as infrastructure, steel structures fabrication and M&E services among others.

Keen on providing complete solutions as one-stop-shop for our customers, we leverage modern work methods & latest equipment with global standards in our construction processes, safety & quality standards

Enlighten us on the unique factor that helps you to deliver exemplary residential & commercial development projects.

Our uniqueness lies in the innovative design and system methodology we use differently. Constructability! Anyone can build, but how we build matters. As we are currently doing more projects in commercial, hospitality and industrial sectors, we use flat-slab system with table formwork. We use different kinds of formwork such as jump form, table form, and aluminium form work among others, which are better & faster than conventional methods. In our projects, we use pre-cast technology along with structural steel composite construction for faster delivery, besides utilizing post tensioning for light weight structures. Our prowess

in BIM and Digital Technologies (E&C 4.0) helps our team to visualize the design early in the development cycle. On top of these, our association with overseas architects helps us to deliver ultra-modern architecture.

Our meticulous focus & delivery models for interiors & landscape makes our commercial projects stand out. We are renowned for our extreme focus on safety and quality. Not only we incorporate rich greenery & world-class landscaping to ascertain a healthy & active living space, but also include eco-friendly initiatives like harnessing solar power, rainwater harvesting and water recycling in our projects. Striving to promote close connectivity to social infrastructure, our projects provide rapid connectivity to airport and other transport modes.

How has your company's journey been so far and what challenges did you encounter during this journey?

With vast global experience of our parent companies, L&W Construction commenced its operations in India in 2006 to carry out businesses in Project Management & Construction activities. We diversified into different verticals over the years and have dominant presence in High Rise Commercial & Residential Buildings, IT Parks, Industrial Complexes, Shopping Malls and Hotels. L&W is fully committed to excellence in quality & constantly develops cost-effective and innovative solutions to meet client's needs.

We emerged above the challenge of scarcity of competent workforce by investing in modern residential technology & training academy. Our standardized work methods, high productivity modern equipment and e-Learning methodologies have helped to develop new competent workforce to deal with the challenge of employee attrition as well. Also, there was a huge gap in culture with employees & partners compared to what we experienced overseas. Our meticulous focus & investments in culture development has helped to develop L&W specific professional culture in our workforce & partners.

What is the future roadmap set for your company?

We continue to bring international standards, latest technologies, safe work methods and best practices in all our projects. We aim to be a leading one-stop-solution provider in the construction, infrastructure eco-system and recognized as a leader for our integrity, professionalism and meticulous focus on safety & quality.
